SUMMARY

Laravel-focused full stack developer building business applications, APIs and operational tools. At XEPOS, deliver across Retail, Hospitality and Loyalty platforms, accounting integrations and delivery operations. Independently lead RentOps and MyPoS from product requirements and workflow design through backend, frontend, testing and documentation.

WORK EXPERIENCE

Full Stack Developer | XEPOS Ltd.

February 2026 - Present

- Designed and built a separate multi-tenant Loyalty platform, integrating member, reward, earn, redeem, refund and reversal workflows with Retail and Hospitality POS systems.
- Delivered Xero integrations across Retail and Hospitality and contributed QuickBooks synchronization workflows, including OAuth, token refresh, background jobs, tax allocation, discounts, partial/full returns and voids.
- Built the Delivery Driver backend and Vue operations portal: tenant provisioning, Retail order ingestion, driver APIs, cash collection, wallet/cash custody, offline reconciliation, proof of delivery and reporting.
- Protected balances and operational state using MySQL transactions, locking, idempotency and explicit lifecycle rules; resolved synchronization defects across till, cloud and third-party boundaries.
- Implemented queue-based processing, retry/recovery paths, structured diagnostics and API documentation; supported C# desktop and Flutter developers through integration contracts and handoffs.
- Delivered responsive interfaces and admin workflows alongside backend changes; configured Forge workers and supported deployment and production troubleshooting.

Laravel Developer | STechSole

September 2023 - February 2026

- Built and maintained Laravel REST APIs and responsive Vue/Blade interfaces for client applications, collaborating with Product and Design.
- Developed modular services, middleware and migrations; debugged and optimized existing applications and supported releases.

Backend Developer PHP Laravel | iT Life

March 2023 - August 2023

- Developed and maintained PHP/Laravel and JavaScript applications, responsive interfaces and live client websites; supported releases and technical issue resolution.

Cloud and Infrastructure Technical Support Intern | Systems Limited

October 2022 - February 2023

- Configured Microsoft AX 2012 and Dynamics 365 environments, gained Azure/Power Platform exposure, and investigated customer technical queries.

SELECTED PRODUCTS AND PROJECTS

RentOps | Personal rental operations SaaS

Laravel 12, Vue 3, TypeScript, MySQL, Redis/Horizon, React Native | *Project details*

- Lead product and engineering across availability, pricing, reservations, evidence-based handover/return, deposits, refunds and settlement; enforce tenant/branch permissions and guarded workflow transitions.
- Built maintenance, damage claims, chauffeur scheduling, vehicle-owner payouts, corporate billing, public booking and automation workspaces; refined operational navigation, shared controls and responsive UI.
- Added a React Native field client with evidence capture, offline queues and conflict recovery. Engineering implementation is documented; production launch and mobile distribution gates remain.

MyPoS | Personal browser based POS platform

Laravel, Vue 3, TypeScript, MySQL, IndexedDB | *Project details*

- Lead a multi-merchant/store POS covering barcode/weighted checkout, split tenders, returns/exchanges, stock and expiry, purchasing, supplier balances, cash control, loyalty, workforce and payroll.
- Built durable offline cash sales and reconciliation, immutable business records, concurrency controls, and responsive light/dark operational interfaces.
- Delivered 77 report definitions with drill-downs, saved filters and authorized CSV/XLSX/PDF exports. Selected reports recorded p95 of 0.72-1.52 seconds over one million synthetic sale lines in a documented local benchmark; live pilot qualification remains.

Tasmiya Enterprises | Business website and CRM

Laravel, Blade, MySQL, WhatsApp | *Project details*

- Built multi-division content and profile administration; added inquiry routing, lead ownership, follow-ups, conversion, activity history and WhatsApp handling. Live message delivery depends on provider configuration.

ADDITIONAL EXPERIENCE

Maintained and enhanced existing ERP applications spanning accounting, sales, purchasing, stock and manufacturing workflows. Earlier projects include HRMS, laundry operations, a B2B marketplace and parking management. Independent MQL5 automation adds modular signal detection, order lifecycle handling, persistence and diagnostics.

TECHNICAL SKILLS

Backend and data: PHP, Laravel, REST APIs, Sanctum, MySQL, Eloquent, migrations, transactions, locking, tenant isolation

Frontend and delivery: Vue 3, React, TypeScript, JavaScript, HTML, CSS, Blade, Tailwind, Vite, Git, GitHub, Postman

Integrations and reliability: OAuth 2.0, Xero, QuickBooks, webhooks, queues, Redis, Horizon, idempotency, synchronization, diagnostics, PHPUnit, Vitest, Playwright

EDUCATION AND CERTIFICATIONS

Bachelor in Computer Science | January 2018 - June 2022 | GPA 3.4 | Lahore, Pakistan

Microsoft Azure Fundamentals AZ-900; Microsoft Azure Developer Associate AZ-204 - Systems Limited
